

- Admin wants a tab to view clients on master page
- Home Page : Clients
- When clicked on client name, then go to their projects
- Field login for field workers
- New end users : Field workers
- They should be able to only add data (Geo-tagged photos)
- Field staff should be able to add data only for given period of time.
- Generate unique client ID and project ID.
- Admin will give credentials for field staff
- Completion progress can be calculated by no.of steps completed.
- Client suggested to add few graphs like sunburst, tree maps
- Client suggested to ignore Data collection part for now
- We showed the visualisation part completed till now
- Option to include graph that might not be in the page(Like linking the graph from external sources(optional) or upload images)
- Case studies upload feature where for every project.
- Different tabs for a project (Overview,Log framework,Pic/Video upload,Case studies,Comments(if possible))
- Download option should be dynamic such that only selected pages are downloaded.
- Drill down feature is not for now. It is required when a dummy project is uploaded.
- Baseline is precondition before the project started and target is the post condition target after the project.
